

Requirement for registration of selected educations in ID06 Competence Database

NCC together with [The Swedish Construction Federation](#) stakeholders are working together to create safer worksites. NCC and several industry colleagues have common view that a number of educations should be registered in the ID06 Competence Database, to facilitate be visibility on the ID06 card.

NCC encourage all our suppliers to document all relevant education and certificates onto the ID06 Competence Database for your and NCC's convenience. Below you will find the list of mandatory requirements of uploaded certificates.
