

# Have you done your Daily Safety Briefing?

1

What **activities** are we doing today?

Gather in your work teams for a *Daily Safety Briefing* of two minutes.

2

Which **risks** do we see in our activities?

Reflect on and discuss today's activities.

3

Are we **prepared** to work safely?

Are the safety risks handled properly and appropriate preparations made?

## Take care of each other

If a new, unsafe situation occurs, take *Time Out*, take the necessary action and continue production under safe conditions.

Take care of each other and establish a habit that can save lives.
